

HEALTHCARE

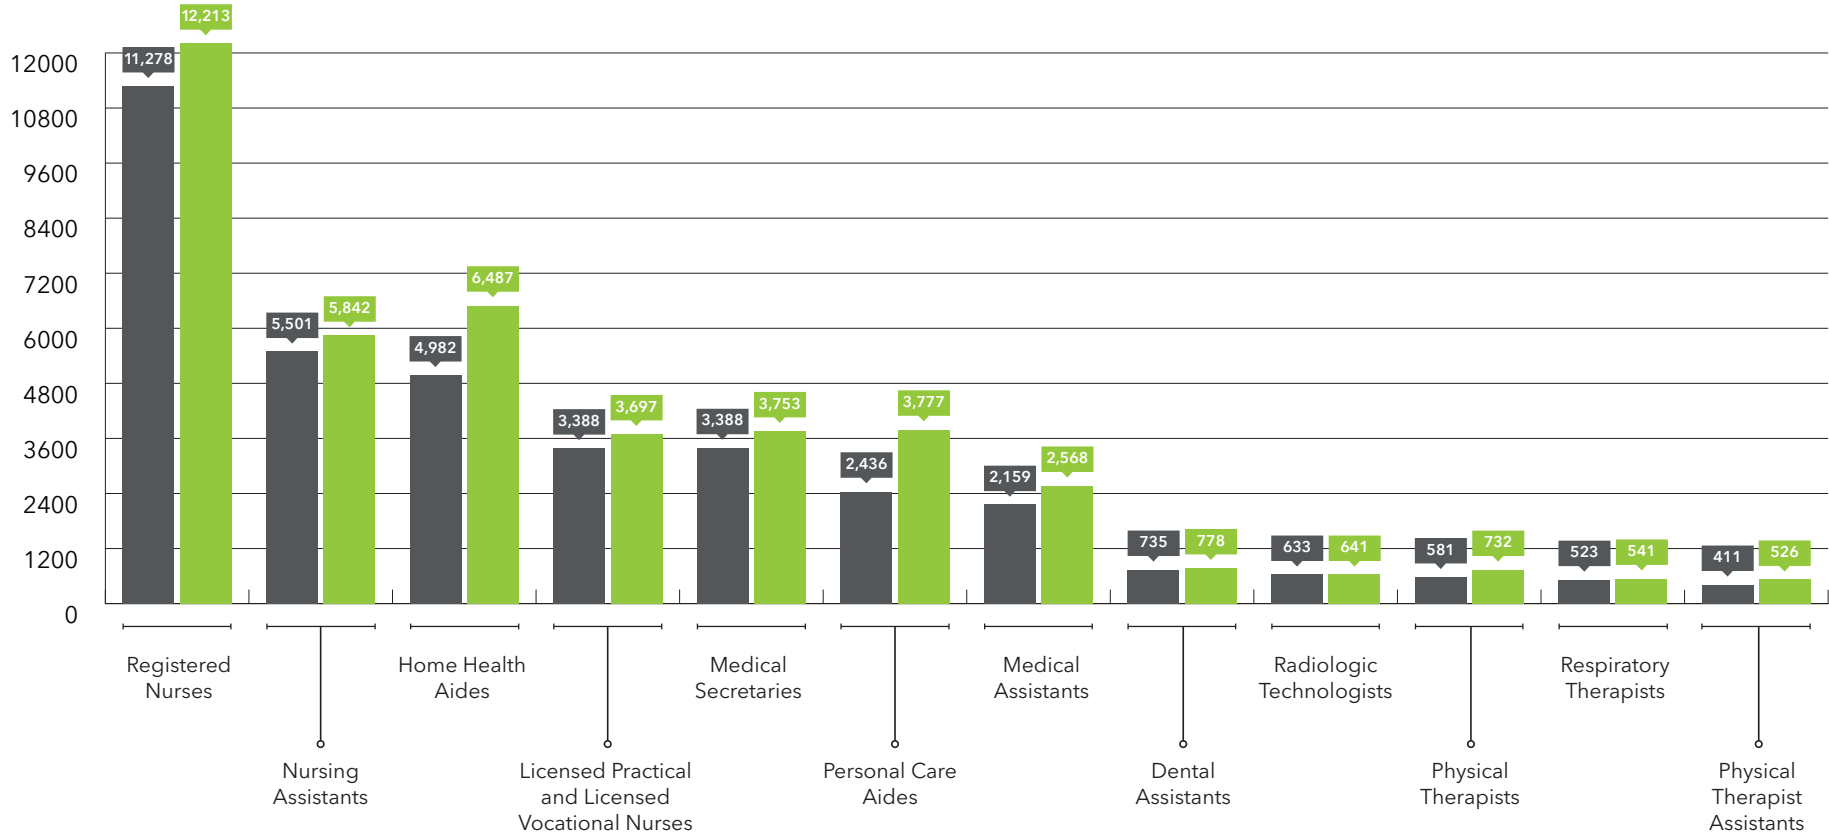

Healthcare is one of the most dynamic and rapidly growing industries in the country.

That's because at some point, it will touch every person in the United States. According to the Greater Dayton Area Hospital Association, more than 20 hospitals are spread across the Dayton region, contributing to \$6.77 billion economic impact. Our hospitals have a significant and quantifiable impact on the local economy by directly employing 31,297 individuals. A future in the healthcare industry looks healthy. According to the Bureau of Labor Statistics, employment growth is expected to be driven by technological advances in patient care, which permit a greater number of health problems to be treated, and by an increasing emphasis on preventive care.
